Cannabinoid Potency Tests (%, by weight)

| Sample ID | Sample Name | Matrix Type | Batch ID | METRC ID | % CBD | % CBDA | % CBN | % d9-THC | % THCA |
|-------------|-------------------|-------------|------------|----------|-------|--------|-------|----------|--------|
| 26R-0136-01 | WM Red Pop W (1g) | CN | 10.28.6916 | ...6917 | ND | <0.28 | ND | 3.95 | 67.5 |

Cannabinoid Potency Tests (mg/g)

| Sample ID | Sample Name | Matrix Type | Batch ID | METRC ID | CBD | CBDA | CBN | d9-THC | THCA |
|-------------|-------------------|-------------|------------|----------|-------|------|-------|--------|------|
| Sample ID | Sample Name | Matrix Type | Batch ID | METRC ID | mg/g | mg/g | mg/g | mg/g | mg/g |
| 26R-0136-01 | WM Red Pop W (1g) | CN | 10.28.6916 | ...6917 | 0.000 | <2.8 | 0.000 | 39.5 | 675 |

Calculated Cannabinoid Potency Values

| Sample ID | Sample Name | Matrix Type | Batch ID | METRC ID | Total | Total Cannabinoid |
|-------------|-------------------|-------------|------------|----------|--------|-----------------------|
| Sample ID | Sample Name | Matrix Type | Batch ID | METRC ID | THC %* | Percentage Detected** |
| 26R-0136-01 | WM Red Pop W (1g) | CN | 10.28.6916 | ...6917 | 63.1 | 73.9 |

*Total THC = d9-THC + 0.877 * THCA. This value represents complete decarboxylation of THCA to form d9-THC.

**Total Cannabinoid Detected represents sum total of CBDVA, CBDV, CBDA, CBD, CBGA, CBG, THCV, CBN, d9-THC, d8-THC, CBC, CBL and THCA

COMMENTS

Test results below the MED Limit are evaluated as Pass. Test Results at or above the MED Limit are evaluated as Fail. None detected indicates a measured concentration below the limit of detection.

These results are for compliance testing and relate solely to the sample tested. Analyzed by Headspace Gas Chromatography and Flame Ionization Detection (HSGC-FID) (SOP 025) at the Denver facility. Report authorized by Lab Director or designee. ASL warrants that all work performed conforms to State of Colorado Department of Revenue – Marijuana Enforcement Division (MED) and the International Standards Organization (ISO)/International Electrotechnical Commission (IEC) ISO/IEC17025:2017 accreditations. The uncertainty associated with the test result(s) is available upon request. Limit of Detection is the lowest quantitative concentration the analytical method can measure. ASL disclaims any implied warranties, except where such a disclaimer is prohibited by law, including any warrant of merchantability or fitness for a particular purpose.

COMMENTS:

Test performed by Gobi Labs

Test results below the MED Limit are evaluated as Pass. Test Results at or above the MED Limit are evaluated as Fail. Not detected indicates a measured concentration below the method detection limit, which is no greater than half of the regulatory limit for each analyte.

These results are for compliance testing and relate solely to the sample tested. Analyzed by High Performance Liquid Chromatography coupled with Tandem Mass Spectroscopy (LC-MS/MS) (SOP 035 & 036) at the Denver facility. Report authorized by Lab Director or designee. ASL warrants that all work performed conforms to State of Colorado Department of Revenue – Marijuana Enforcement Division (MED) and the ISO/IEC17025:2017 accreditations. The uncertainty associated with the test result(s) is available upon request. ASL disclaims any implied warranties, except where such a disclaimer is prohibited by law, including any warrant of merchantability or fitness for a particular purpose.
